

Please reject NAB's petition 04-160. It is clear that the NAB does NOT have the public interest at heart. Satallite radio provided instant Traffic and Weather is constant and accurate. We do not have to listen to 15 minutes of garbage music or babbling to get the traffic and weather reports that are useful when we get the info from sat radio dedicated traffic and weather channels.

The advantages to the CONSUMER of satellite radio are HUGE and should not be infringed because of a selfish corporate-owned association like the NAB.

Please act in the PUBLIC INTEREST and reject 04-160.

Regards,
Ron Dawes
